EUROMIND AS PROJECT PARTNER

1. Profile Description

Euromind is an international training consultancy and VET provider with headquarters in Seville and Úbeda in Andalusia (Spain).

Euromind as a training provider delivers vocational education trainings, general and job-related language courses, VET training-related workshops and study visits, workshops on culture, lifestyle and customs of EU countries as well as classes on skilful and effective job search in the EU.

It promotes and delivers trainings for teaching staff and secures work placements and exchange activities for VET students and graduates enabling at the same time young people and professionals to make the most out of opportunities of competencies & skills development offered by European educational programmes.

Euromind in partnership with Andalusian vocational colleges and companies delivers school based vocational trainings for students of different educational fields, such as: CNC, automation, electricity, renewable energy sources, plumbing, industrial and graphic design, 3D design, ICT, electronics, administration.

Euromind as a VET provider works in partnership with a wide array of private companies in almost all the sectors, such as tourism, business administration, medicine, fashion, hairdressing, health & beauty, physiotherapy, marketing, media, advertising, public relations, tourism, IT, social work, logistics, nursing, construction, geodesy, analytics etc.

2. Euromind experience and expertise

The Euromind possesses extensive experience and expertise in the field of European mobility projects preparation and management which allows it to assist Spanish vocational colleges and governmental institutions with the preparation of project applications, finding trustworthy and competent host partners in Europe for their project participants, teaching and HR staff.

Over last 3 year Euromind has participated as a receiving – host partner in over 60 mobility projects with the participation of a total of 1800 persons: students from technical and vocational schools, university students, graduates, unemployed and teaching and HR staff. These projects involved partners from Poland, Great Britain, Czech Republic, Slovakia, Germany, Portugal, Turkey, Croatia, Italy, Greece, Bulgaria, Lithuania, Latvia, etc.

The full list of projects including numbers and titles is available on the Euromind website: www.Euromind.es in the Gallery.

Euromind is also responsible for the participants' linguistic, socio-cultural and practical preparation and also, if necessary, for the project administration and management issues.

Euromind has been participating as a sending and host organization in more than 100 projects including Leonardo Partnership, Erasmus Placement and Leonardo Mobility – PLM, VETpro and IVT and Erasmus + projects.

Euromind monitors that all the required documentation is prepared and submitted on time at every stage of the project lifecycle and makes sure that all the partners carry out their responsibilities.

Euromind participates in seminars organised by ECVET team regarding the use of system of transfer of competences and skills in the vocational training. Euromind experts have extensive knowledge in the field, hence they are able to train their partners on how to make use of this system in their projects.

Euromind has an impressive network of partner companies from different economic sectors. More than 800 entities both private and public cooperate with Euromind in Ubeda, Seville and Malaga. This extensive activity is a perfect guarantee that all the students received by Euromind will be successfully placed.

PROJECT PARTICIPANTS' LIST

Participants' Name	Placement Sector
VICENT - ILIE DUROI	Car mechanic
DANIEL - ALEXANDRU FALCEA	Car mechanic
ADRIAN - EDUARD GINGU	Car mechanic
CRISTIAN - GEORGE IACOB	Car mechanic
GABRIEL - NICUSOR DINUT	Car mechanic
ADRIAN - IONUT PILSU	Car mechanic
IONUT - GABRIEL PATRASCU	Car mechanic
RAUL - GABRIEL NICHITA	Car mechanic
ANGELO - STEFAN STANCIU	Car mechanic
DENIS - IONUT STINGA	Car mechanic
IONUȚ - CRISTIAN DUROI	Car mechanic
ALEXANDRU - TEODOR BUSOI	Car mechanic
ROBERT DANIEL RADUCANU	Car mechanic
NICUSOR - IONUT LAZAR	Car mechanic

Host Organization: Autocares Carmona Díaz S.L.

Tutor's name: Juan Antonio Carmona Díaz

1. Description of the host organization

Autocares Carmona (Autocares Carmona Díaz S.L.) is a transport company that offers services in the organization of local and national transport in Spain. Professional bus and minibus service for school routes, trips, local journeys are offered and service for organized and occasional events. Their professionals are also in charge of the maintenance, repair and comprehensive care of the vehicles, as well as everything related to their logistics.

2. Main responsibilities & tasks carried out during the work placement

- Helping with the installation and replacement of car air conditioning
- Assisting in aligning and repairing wheels
- Assisting in inspecting and testing new vehicles to detect potential faults
- Helping in lifting the vehicle to a specified level, using a hydraulic jack
- Disassembling units such as engines, gearbox etc. using manual or electric tools
- Performing basic services and repair activities related to car servicing, i.e. oil and filters change, defective parts replacement, washing of the engine and other car components
- Evaluating the quality of mechanical, electrical and electronic vehicle equipment operations
- Selecting and using measurement instruments and diagnostic equipment in the vehicles
- Using diagnostic computers and oscilloscopes in the workplace
- Repairing car body, i.e. welding, brazing, riveting, sheet metal and profiles bonding, assembling and disassembling of car body components and chassis

VICENT - ILIE DUROI

1. Tutor's final evaluation

6 (Excellent)

2. Participant's opinion about his personal & professional development

The Erasmus+ project was an opportunity for me, I learned to communicate better, to have more confidence in myself and to manage on my own. I really enjoyed flying by plane for the first time. I participated in new and exciting activities. I did the internship at Autocares Carmona Díaz S.L under the guidance of the tutors Juan Antonio and Carmona Diaz who were wonderful. They explained to me very clearly every morning what tasks I had and at the end of the day I was satisfied knowing that I managed to solve them. This company carries out maintenance operations and current repairs to coaches. I learned to do various maintenance work, such as replacing light bulbs, changing oil, filters, brake discs and brake pads, checking and topping up radiator fluid, replacing used tires. I have seen the differences in the maintenance of buses compared to cars, because I have not had the opportunity to work in such a company until now. The free time was dedicated to the discovery and knowledge of the Spanish culture and civilization, through cultural visits to historical sites in Malaga and Andalucia. I have only very good impressions of Spain and have brought back beautiful memories of this country and the people in our country. On my free days, I visited many tourist and cultural sites in Malaga and its surroundings, in Cordoba and Ronda, which impressed me and I liked them very much. I liked the panorama of the city from the port of Malaga. I thank the Erasmus + program for the opportunity to participate in this program. Vocational training in Spain was a positive experience that helped me improve my professional and personal knowledge and skills. It was another way of learning, in another country that I really enjoyed!

Host Organization: Talleres Joaquín 2011 S.L.

Tutor's name: Santiago Jiménez

1. Description of the host organization

Talleres Joaquín is a centre specialized in Mechanics, Electricity and Vehicle Repair in Malaga. With core values of professionalism, trust and customer satisfaction, they offer a wide range of services, including maintenance, overhaul and repair of vehicles. In addition, they provide complementary services such as courtesy car and tire service and winter tune-up. With high quality spare parts available, they stand out for their speed, affordable costs and personalized attention. They also offer additional services such as passing the ITV (vehicle inspection), cloning of control units and virginizations.

2. Main responsibilities & tasks carried out during the work placement

- Helping with the installation and replacement of car air conditioning
- Assisting in aligning and repairing wheels
- Assisting in inspecting and testing new vehicles to detect potential faults
- Helping in lifting the vehicle to a specified level, using a hydraulic jack
- Disassembling units such as engines, gearbox etc. using manual or electric tools
- Performing basic services and repair activities related to car servicing, i.e. oil and filters change, defective parts replacement, washing of the engine and other car components
- Evaluating the quality of mechanical, electrical and electronic vehicle equipment operations
- Selecting and using measurement instruments and diagnostic equipment in the vehicles
- Using diagnostic computers and oscilloscopes in the workplace
- Repairing car body, i.e. welding, brazing, riveting, sheet metal and profiles bonding, assembling and disassembling of car body components and chassis

DANIEL - ALEXANDRU FALCEA

1. Tutor's final evaluation

6 (Excellent)

2. Participant's opinion about his personal & professional development

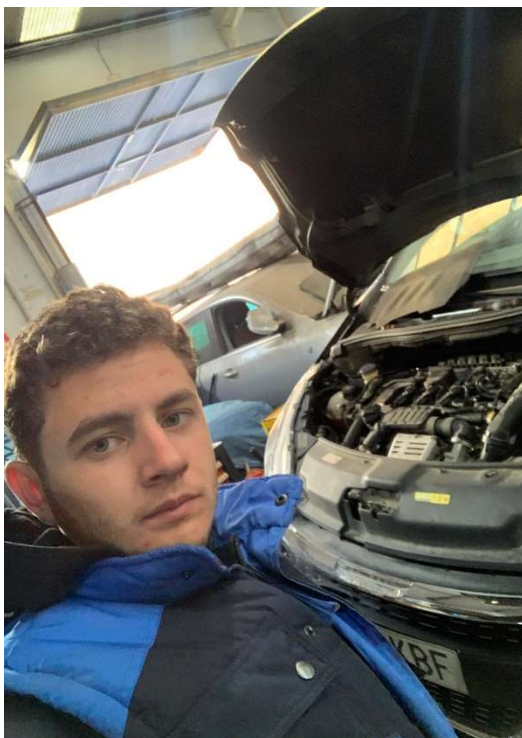

Let me tell you about my adventure in the Euromind project. First of all, I want to tell you that I felt at ease here, especially in the internship at Talleres Joaquin 2011 S.L, a service that deals with carrying out technical revisions of cars.

I had the opportunity to perform verification operations, replacement of parts and small repairs on various types of automobiles.

In addition to the activities within the project, I also had the opportunity to experience the Spanish lifestyle. We explored famous sights such as the cities of Cordoba, Setenil de las Bodegas and Ronda.

I saw a lot of beautiful things, I was impressed by Ronda, the city on the rocks, a very beautiful view with amazing vegetation, clean air, I didn't want to come back home. I had the great chance to explore Spanish history and culture interactively and engagingly, enjoying the architecture and history of the city and its surroundings.

It was a very nice experience. I would love to come back to Malaga and I wish everyone who will come will enjoy it as much as I did. Thanks to Euromind and Erasmus+ for these great experiences!

Host Organization: MontyAuto 2021

Tutor's name: Andrés Sánchez Cobos

1. Description of the host organization

Montyauto 2021 is an independent car workshop that offers a wide range of standard services for all types of car brands. These services include tire changing, official inspection, engine and brake fault detection, and oil change. In addition, it has special services such as free home collection and delivery, a manufacturer's warranty on repairs and inspections and a free replacement car for repairs lasting more than one day, with most repairs carried out on the same day.

2. Main responsibilities & tasks carried out during the work placement

- Helping with the installation and replacement of car air conditioning
- Assisting in aligning and repairing wheels
- Assisting in inspecting and testing new vehicles to detect potential faults
- Helping in lifting the vehicle to a specified level, using a hydraulic jack
- Disassembling units such as engines, gearbox etc. using manual or electric tools
- Performing basic services and repair activities related to car servicing, i.e. oil and filters change, defective parts replacement, washing of the engine and other car components
- Evaluating the quality of mechanical, electrical and electronic vehicle equipment operations
- Selecting and using measurement instruments and diagnostic equipment in the vehicles
- Using diagnostic computers and oscilloscopes in the workplace
- Repairing car body, i.e. welding, brazing, riveting, sheet metal and profiles bonding, assembling and disassembling of car body components and chassis

ADRIAN-EDUARD GINGU

1. Tutor's final evaluation

5 (Very good)

2. Participant's opinion about his personal & professional development

I was encouraged to go to an Erasmus project by my older colleagues, who were in Malaga last year. Now I see that everything they told me is true. I like everything here. The fact that it is warm, lots of sun, there are palm trees, flowers and cactuses. It's the first time I see the sea and I like that; we are staying close to the seashore, in a very nice and spacious hotel. The meals are not "like at home", but here I had the opportunity to try the taste of Spanish cuisine. I found out that I like squid, which I had only heard of until now.

I really like the practice because everyone there is attentive to me and are interested in teaching me something. Here I noticed that great attention is paid to our safety, we are not allowed to do work where we could get injured. Even if the way to practice is a bit long, I like going by train. I'm sorry that we have to leave so soon, I would have liked to learn more time here at the service.

The trips at the end of the week were very nice. In Cordoba it was about culture and religion, and in Ronda about the beauty of nature and a spectacular canyon.

There are so many new things that I have seen and experienced here; I hope I will never forget them.

And when I get home, I will encourage my younger colleagues to come to Spain for an internship.

Host Organization: Caja de Cambios Automáticas Internacional S.L.

Tutor's name: Jerónimo Carrique Cabeza

1. Description of the host organization

Caja de Cambios Automáticos (Caja de Cambios Automáticos Internacional S.L) is a company dedicated to the integral service and repair of automobiles. Its facilities have an area of 1000 m2 and are equipped with state-of-the-art diagnostic machines. The workshop is specialized in the repair, maintenance and replacement of gearboxes of all brands, both electronic and mechanical.

2. Main responsibilities & tasks carried out during the work placement

- Helping with the installation and replacement of car air conditioning
- Assisting in aligning and repairing wheels
- Assisting in inspecting and testing new vehicles to detect potential faults
- Helping in lifting the vehicle to a specified level, using a hydraulic jack
- Disassembling units such as engines, gearbox etc. using manual or electric tools
- Performing basic services and repair activities related to car servicing, i.e. oil and filters change, defective parts replacement, washing of the engine and other car components
- Evaluating the quality of mechanical, electrical and electronic vehicle equipment operations
- Selecting and using measurement instruments and diagnostic equipment in the vehicles
- Using diagnostic computers and oscilloscopes in the workplace
- Repairing car body, i.e. welding, brazing, riveting, sheet metal and profiles bonding, assembling and disassembling of car body components and chassis

CRISTIAN - GEORGE IACOB

1. Tutor's final evaluation

4 (Good)

2. Participant's opinion about his personal & professional development

I consider myself lucky to have been able to participate in this mobility and I want to thank Euromind for this wonderful program. These two weeks of practice were very useful for me because I learned many new things. For me, it was a unique experience that I will never forget! I consider the project to be one of the most positive experiences I have participated in so far and I hope that what I have gained will be useful in my professional future! I'm glad I was part of this project, I had two unforgettable weeks in Torremolinos and in Malaga. During our free time, we had the opportunity to explore the beautiful cities of Cordoba, Setenil and Ronda. Ronda is a historic city with spectacular views. The Puente Nuevo Bridge, which connects the two sides of the El Tajo Gorges, was a highlight of the visit, offering unforgettable panoramic views.

I highly recommend future participants to take part in these types of projects, because they will benefit both professionally, culturally and personally!

GABRIEL-NICUSOR DINUT

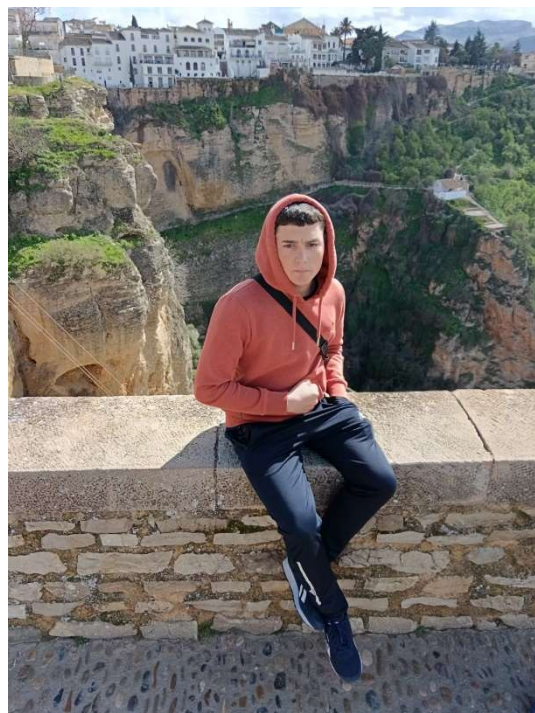

1. Tutor's final evaluation

5 (Very good)

2. Participant's opinion about his personal & professional development

It was my first participation in an Erasmus+ project and I am very excited about this opportunity because I had the opportunity to participate in a professional training program in the field in which I am training. I did my internship at Caja de Cambios Automáticas Internacional S.L. and I had Jerónimo Carrique Cabeza as my tutor. I changed gearboxes in cars, changed the oil, helped to assemble the parts and painted them. Our guardian behaved very well with us, and we respected him.

I had a very good experience with this Erasmus+ project. We went on two weekend trips to Cordoba, Setenil and Ronda with our teachers and we had a great time. On sunny days I was on the beach taking pictures. The beauty of the country, the nature, the hospitality of the locals and the smiles left only good memories. Thanks to Euromind and Erasmus+ for these great experiences!

ADRIAN-IONUT PILSU

1. Tutor's final evaluation

5 (Very good)

2. Participant's opinion about his personal & professional development

I'm glad I was part of this project, I had two unforgettable weeks in Torremolinos. I stayed at Hotel Albergue Inturjoven Torremolinos. The location is right in front of the beach, we just have to cross the street which is amazing. The staff was very friendly and helpful. The internship at Caja de Cambios Automáticas Internacional S.L was very useful, so everything I did in the internship will help me in my future job. I changed the wheels on the cars, lowered the arms, changed the telescopes, changed the car's oil and changed the air filters. My practice tutor was very close and open with us. I visited the cities of Cordoba and Ronda, which I really liked. These cities are very compressed with things to see, bridges and wonderful views of the mountains and landscape. I also experience many interesting things and learn to work as a team with different people where we have fun and make memories together. We also met other students from Poland, France and Italy with whom we became friends. The trips and visits were very nice... I was most impressed in Malaga by the magnificence of the cathedral and the fact that I got to know the city where a great painter of the world, Picasso, was born. Thank you Euromind for organizing this mobility, everything was well prepared and organized so that I had an unforgettable experience! Many thanks to my teachers!

IONUT-GABRIEL PATRASCU

1. Tutor's final evaluation

6 (Excellent)

2. Participant's opinion about his personal & professional development

I did my internship at a service that does maintenance and repairs on automatic gearboxes. Everything I learned here was completely new to me.

I cleaned parts with a pressurized jet or diesel brush, changed gaskets, learned to change the oil and the oil filter in the automatic transmission. Together with my colleagues, I assembled all the parts in an automatic box in one day, after cleaning them.

Although I had emotions at the beginning, I can say that it was easy for me to manage. If you are serious and get involved, you are appreciated by the tutor. I communicated with the mechanics in English but also in Spanish, I learned new words and I think I would manage if I went to work abroad.

In practice, I wanted to have very good results from home and I am glad that I succeeded.

The visit to the city of Malaga and the excursions were very beautiful and useful for our culture. I learned interesting things from the history and civilization of Spain. I saw cultural buildings or famous tourist attractions in Spain: in Cordoba, the largest mosque-cathedral in Europe; in Ronda, the most spectacular canyon and Puente Nuevo, the stone bridge; in Setenil de la Bodegas, a unique landscape with all the white houses and some built in the rock, and in Malaga, the beautiful cathedral and the Alcazaba fortress.

I can say that I leave here more mature and more convinced that I can do much more than I thought until now.

Host Organization: Talleres Confiautos - Jose Carlos Hernandez

Tutor's name: José Carlos Hernández

1. Description of the host organization

Talleres Confiautos is a workshop specialized in all car brands in the European market. A reliable workshop, where they are committed to the attention to their customers and the quality of their work. The company has professional mechanics and electricians, car performance specialists, engineers and entrepreneurs.

2. Main responsibilities & tasks carried out during the work placement

- Helping with the installation and replacement of car air conditioning
- Assisting in aligning and repairing wheels
- Assisting in inspecting and testing new vehicles to detect potential faults
- Helping in lifting the vehicle to a specified level, using a hydraulic jack
- Disassembling units such as engines, gearbox etc. using manual or electric tools
- Performing basic services and repair activities related to car servicing, i.e. oil and filters change, defective parts replacement, washing of the engine and other car components
- Evaluating the quality of mechanical, electrical and electronic vehicle equipment operations
- Selecting and using measurement instruments and diagnostic equipment in the vehicles
- Using diagnostic computers and oscilloscopes in the workplace
- Repairing car body, i.e. welding, brazing, riveting, sheet metal and profiles bonding, assembling and disassembling of car body components and chassis

RAUL-GABRIEL NICHITA

1. Tutor's final evaluation

3 (Satisfactory)

2. Participant's opinion about his personal & professional development

I am glad that I was part of the Erasmus+ program and I was in an internship in Malaga.

We stayed at the Albergue Inturjoven Torremolinos hotel, a very beautiful location, with a swimming pool and palm trees, close to the beach. Torremolinos, with its Mediterranean climate and impressive landscapes, became the perfect host for this Erasmus+ experience. I liked the people I met in Spain.

These two weeks of practice in this wonderful project were very useful to me because I learned many new things. I did my internship at Talleres Confiautos. Tutor Jose Carlos Hernandez was with us and taught us a lot about the job. He explained to us in detail when we asked and with his help we managed to do quality work.

I liked to see how the job of a car mechanic is done in a service in Europe. What seemed different to me here were the people, who are more open and welcoming.

In the weekend we visited the beautiful cities of Cordoba and Ronda. The people I met on the street, in museums, in shops, in restaurants were very kind and polite.

It is a unique, useful and very beautiful experience! Now I say it was wonderful and the program and the people I met and the country I saw for the first time!

ANGELO-STEFAN STANCIU

1. Tutor's final evaluation

3 (Satisfactory)

2. Participant's opinion about his personal & professional development

I was looking forward to coming to Malaga and I am very happy here. In practice, everything is very good, I can say that I learned a lot in a short time, thanks to our tutor, Mr. Jose Carlos Hernandez. I like that the tutor puts us to work, has expectations from us and considers us his reliable helpers. I also learned things that I didn't do at home, such as taking apart an engine, using the right tools and devices and doing maintenance work on brakes and transmission.

We are staying in a nice hotel where I met colleagues from other countries with whom I became friends. I like the atmosphere here, there are only students, we feel very good together, in the afternoon during our free time. I would like it to be as beautiful at my school dormitory.

I am happy because I went on two very nice trips, I saw places full of history in Cordoba, I visited the old center which is on the UNESCO world cultural heritage list and the famous Mezquita. I also liked the town with all the white houses of Setenil built in the rock, and in Ronda I was amazed by the beauty of the canyon.

I can say that the Erasmus project offered us a lot and I hope that I also fulfilled my tasks and rose to the level of the expectations of the tutor in Spain and of my teachers from Romania.

Host Organization: Reparaciones De Mecánica Chacón

Tutor's name: Mari Carmen Chacón

1. Description of the host organization

Chacón Mechanics Repairs is a workshop specialized in car repairs located in Malaga. With a strong reputation for reliability and quality service, they serve customers of all makes of vehicles. They offer a wide range of services, from basic maintenance to more complex repairs, including engine diagnostics, brake repairs and oil changes. Their commitment to customer satisfaction and professional approach makes them a trusted choice for vehicle maintenance needs in the region.

2. Main responsibilities & tasks carried out during the work placement

- Locating defects in parts or components of the vehicle
- Carrying out maintenance tasks and basic repairs of a car, such as changing the oil and oil filters, adjusting tyres etc.
- Respecting the terms of agreement with the manufacturers specific technology
- Removing parts using hand tools and electric tools
- Waxing and cleaning the vehicle
- Evaluating the quality of the mechanical, electronic and electrical operations of the features of the vehicle
- Selecting the repair methods and the diagnostic equipment
- Providing appropriate care of the vehicle before returning it to the client

DENIS - IONUT STINGA

1. Tutor's final evaluation

6 (Excellent)

2. Participant's opinion about his personal & professional development

The Erasmus+ project was an opportunity for me, I learned to communicate better, to have more confidence in myself and to manage on my own. I participated in new and interesting activities. In these two weeks I learned a lot of new things, for example, I learned about the culture of Spain and the profession I will practice as a car mechanic. I am very proud that I was lucky enough to meet wonderful people with whom I spent these 2 weeks. Antonio Chacon Muñoz was my tutor, a wonderful man from whom I learned a lot. I learned to change brake pads, oil filters and air filters, I took down the engine, changed the brake pads and the planetary gears on the car.

In our free time we visited two very beautiful cities in Spain, Cordoba and Ronda, some of the oldest cities in Spain, known for their position and spectacular views. In my opinion, I am very happy that I participated in this project, and I encourage the other colleagues to come. Thanks to the Erasmus + Program and the coordinating team in this project!

IONUȚ-CRISTIAN DUROI

1. Tutor's final evaluation

6 (Excellent)

2. Participant's opinion about his personal & professional development

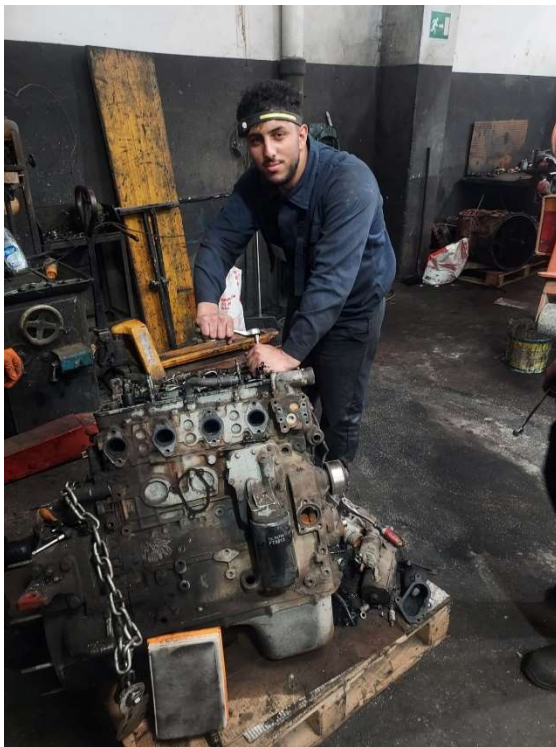

I consider that this internship in Malaga is a step forward in my training as a future car mechanic and in general, in life.

I liked the service because the mechanics work cleanly, orderly and every car is repaired with great care. I was surprised that the mechanics immediately put me to work, from the first day I learned about injectors and the injection pump, I did maintenance works that I didn't do at home. I changed oil and fuel filters, replaced a clutch, changed a cylinder head and dismantled an engine.

Here people are welcoming and benevolent. At the service, they did everything possible to make us feel good and to work as a team.

I liked everything here. I had very good conditions at the hotel, good food, nice excursions.

I am lucky to have participated in this project, which will remain for me the most beautiful experience of my school years.

Host Organization: DMJ Garage - Daniel Martín

Tutor's name: Daniel Martín Jorge

1. Description of the host organization

DMJ Garage is a car workshop that provides general mechanic services (engine, suspension, body; service plans) and official vehicle inspections according to manufacturer requirements (brakes, clutches, automatic transmissions, timing belts, diagnose electrics). They have the latest technology to detect the exact location of the fault or breakdown and give the best repair solution. In addition, they provide a full guarantee of the vehicles they prepare, so that they successfully pass technical tests (ITV).

2. Main responsibilities & tasks carried out during the work placement

- Helping with the installation and replacement of car air conditioning
- Assisting in aligning and repairing wheels
- Assisting in inspecting and testing new vehicles to detect potential faults
- Helping in lifting the vehicle to a specified level, using a hydraulic jack
- Disassembling units such as engines, gearbox etc. using manual or electric tools
- Performing basic services and repair activities related to car servicing, i.e. oil and filters change, defective parts replacement, washing of the engine and other car components
- Evaluating the quality of mechanical, electrical and electronic vehicle equipment operations
- Selecting and using measurement instruments and diagnostic equipment in the vehicles
- Using diagnostic computers and oscilloscopes in the workplace
- Repairing car body, i.e. welding, brazing, riveting, sheet metal and profiles bonding, assembling and disassembling of car body components and chassis

ALEXANDRU-TEODOR BUSOI

1. Tutor's final evaluation

6 (Excellent)

2. Participant's opinion about his personal & professional development

After I found out that I would be going to Malaga for two weeks to practice, I saw myself in a large and modern service, with the latest generation equipment, with mechanics skilled in everything. DMJ Garage, where I was assigned, is a service beyond expectations, where I would like to work after I finish school. I have never seen such a clean and orderly service, here even the engines under the hood of the car shine with cleanliness.

Here everything is in order, everyone knows what they have to do, the emphasis is on order and seriousness. Here I learned to be punctual, to work slowly, cleanly, carefully, so as not to injure myself. I learned new things, such as how to mount all the accessories on an engine, the order in which they are mounted, how to disassemble a gearbox and balance the wheels.

What I really like is that we are also put to work, just like the service mechanics. I tried very hard to do everything as the tutor taught me and I hope he is satisfied with me.

I like that here in Spain, people are happy, calm, they have time to smile and explain to us.

All the time spent here was loaded with special activities. The trips were the most beautiful of my life, I saw Cordoba and Malaga, two extraordinary cities! It would never have occurred to me that I would get to see the Mediterranean Sea and walk on the beach with my friends.

Thank you to all those who made this mobility possible!

ROBERT DANIEL RADUCANU

1. Tutor's final evaluation

6 (Excellent)

2. Participant's opinion about his personal & professional development

I was very happy when I found out that I was selected for this Erasmus project. Here, in addition to my job, I learned things that I could not learn at school, I saw the world, and I learned how to manage on my own, far from home. In practice, I had something different to learn every day, cars were always coming to the service for repairs and maintenance. I settled in quickly and made a good team together with two other colleagues. The tutor was very "good", she put us to work but also joked with us.

I had a nice program, on the weekend I made two trips to wonderful places, famous tourist attractions: Cordoba, the cultural capital of Andalusia and Ronda, the city next to a spectacular canyon. I also liked the visit to Malaga and the city of Torremolinos. I am sure that this mobility will benefit me and that everything I learn now will be useful in the future.

NICUSOR-IONUT LAZAR

1. Tutor's final evaluation

6 (Excellent)

2. Participant's opinion about his personal & professional development

I wanted to come to Spain, primarily for practice. I like the job of car mechanic and I want to learn it as well as possible. I like it so much at the service where I practice, DMJ Garage in Benalmadena, that I would stay there all day to work.

I learned new and slightly more difficult things here, such as setting up the distribution or mounting a clutch disc. Our tutor, Daniel Martin, is a very good teacher, he gives us all the time to work, he is understanding and calm. Any mistake I make is "no problem" for him and a reason to be encouraged. Like that he trusts me and lets me do simple maintenance and repairs by myself.

Ever since I got off the plane, I was surprised by the beauty of Spain. I have never seen a city as beautiful as Malaga, I liked the trips to Cordoba, Ronda and Setenil de la Bodegas.

Also, staying in a hotel close to the shore of the Mediterranean Sea is particularly nice.

I will go home with many beautiful memories spent with my colleagues and with unique experiences.

PROJECT MANAGEMENT

1. Mobility Project Preparation & Induction

Before the arrival of your trainees in Spain, Euromind provided them with the pre-arrival guide, including useful information, local transport & social life, emergency numbers.

Euromind has also arranged Skype meeting with the participants in order to get to know them and to interview them.

After the Skype interview, Euromind created a Facebook group to which all the selected participants were invited, together with their Teachers. This way Euromind Coordinator had constant contact with the target group already before their arrival in Spain.

Once the Skype interviews were delivered, Euromind upon a thorough analysis of the participants' studies and profile provided each one of them with an adequate work placement.

Euromind took responsibility for preparing Learning Agreements individually for each participant and made sure that all the parties involved signed all the necessary documents.

On the first day after the arrival, Euromind organized the welcome session during which the participants got to know the Euromind team, were reminded about the programme agenda, accommodation rules and dissemination strategy options.

Later on, the participants were taken for a walk around the neighborhood to get to know the area and find out where banks, mail box, workplace, supermarkets, bus station are.

2. Monitoring & Mentoring

In order to make sure that the objectives of the Learning Agreement were going to be achieved and that the participants would be fully integrated in the companies' work culture, the monitoring was delivered by all of the parties involved in the project.

Euromind assigned a Mentor for the group of participants who was responsible for the introduction of the participants to the host organisation(s). During the work placement/training the Mentor delivered monitoring visits to the work placements in order to revise the tasks of the trainees, their progress as well learn from the first hand the level of satisfaction of both the participants and the host companies/ training centre tutor.

The mentor in cooperation with companies Tutors carried out the evaluations of the trainees in the middle and at the end of the trainings.

After obtaining the results of the half-way through evaluation, the Mentor met the participants to give them the results of this evaluation. The least favourable results were discussed with the participants in private so that both the Mentor and the trainees had the comfort of sharing the information and exchanging the opinions and finding solutions to some problematic issues.

Host organisations assigned a member of its staff as a tutor. The tutors from the host companies were responsible for helping, informing and guiding and supervising the work done by the participants. The tutors had regular meetings with the participants in order to assess their presence in the company as well as to discuss the tasks and responsibilities according to the needs of the company and the participants.

Euromind at the end of the programme during the goodbye session handed out evaluation sheets to the participants so that they could assess their stay in Spain, work placements, as well as the work of the Euromind.

Euromind was also available to the participants 24/7 in case of emergency.

3. Communication

Euromind takes good care of successful communication between companies and trainees. Each evaluation of work is aimed at improving the quality of cooperation. Each party is thoroughly checked and assessed and the necessary improvements are introduced. Moreover, Euromind mediates in this supervisor-trainee collaboration by translating and solving language-connected complicated matters.

4. Dissemination strategy

Euromind took active part in the process of preparing and dissemination results of the project together with the sending organisation and participants.

While the trainees were in Spain, Euromind involved them in a number of activities the aim of which was to make students monitor and collect all the information related to the progress of their work placements and stay in Spain. The materials produced by the participant would be then used as tools for disseminating results by the school in their country and by the partner in Spain.

The participants could work in groups or individually. On the first day they needed to decide on the form or forms of recording their professional experiences.

As a rule the whole group needed to create a Facebook fun page as it is an effective and quick means of accessing large numbers of people. What is more, it is a form that appeals to young people as they can share their experiences instantly and receive instant feedback, too. The fan page is always linked to the Euromind's Facebook fan page. The sending organisation was also asked to do the same thing.

5. Certification

To validate the acquired skills, the trainees, at the end of their stay, received complete proof of their participation in the project by means of several methods of recognition:

- Training Certificate
- Europass Mobility Certificate

CULTURAL PREPARATION

1. Cultural activities, Andalusian cities & places visited during the programme

Walk around Malaga city centre

On the walk around Malaga city centre the trainees were able to see Malagas oldest parts and explore its history. Dating back to almost 800 BC, Malaga is one of the oldest cities in the world. The tour passed by ruins from The Roman, Moorish and Christian civilizations including The Roman Theatre, The Alcazaba, The Cathedral of Malaga and St. Johns Church.

Day trip to Cordoba

Córdoba was a Roman settlement on the right bank of the Guadalquivir, taken over by the Visigoths, followed by the Muslim conquests in the eighth century and later becoming the capital of the Umayyad Caliphate of Córdoba. During these Muslim periods, Córdoba was transformed into a world leading center of education and learning. Following the Christian conquest in 1236, it became part of the Crown of Castile. It is home to notable examples of Moorish architecture such as the Mezquita-Catedral, which was named as a UNESCO World Heritage Site in 1984 and is now a cathedral. The UNESCO status has since been expanded to encompass the whole historic centre of Córdoba, Medina-Azahara and Festival de los Patios. Much of this architecture, such as the Alcázar and the Roman bridge has been reworked or reconstructed by the city's successive inhabitants.

Day trip to Ronda

Ronda is known for its cliff-side location and a deep chasm that carries the Guadalevín River and divides the town as well as many legends and love stories related to the construction of the town or its promotion. One of the well-known places is El Tajo Bridge - vertical, majestic walls that divide parts of the city into an older district, founded back in the Middle Ages, and a newer one. Traditional bullfighting can also be enjoyed in the town, especially since Ronda is home to one of the oldest bullfighting arenas in Spain, although this is an entertainment rather for people with strong nerves.

SUMMARY OF THE PROJECT

Euromind team did their best in order to deliver the best professional and cultural experience to the trainees of the project being always ready to help, give advice and solve any problems or doubts.

The trainees were fully satisfied with their work placements. They gained much needed professional experience abroad which is highly appreciated and sometimes even specifically asked by today's employers.

We have no doubt that our trainees will use their new knowledge and experience at their current work in their home country or increase their chances at the labour market and dazzle their future potential employers.

Moreover, the trainees learnt the basics of the Spanish language were able to work in a multi-cultural environment and proved themselves with the ability to work individually as well as in a team.

Euromind team was extremely satisfied with the trainees' involvement in the project and personal interest in whatever they participated in.

This project was very successful and we hope to realize other successful projects with Liceul de Transporturi Auto in the future.
